Smart Snacks in School

The Smart Snacks in School nutrition standards support better health for our kids and echo the good work already taking place in schools across the country. The Smart Snacks in School interim final rule food and nutrition standards will become effective on July 1, 2014.

Competitive Food Service

Competitive foods are food or beverage items sold in competition to the reimbursable school meal and the goal is to limit access to these foods. Consequently, any food or beverage service available to students on the school campus during the school day that is separate and apart from the district's nonprofit federally reimbursed food service program, and is operated by school approved organizations or by school-approved outside vendors shall not operate in competition with the district's food service program and shall be closed for a period beginning ½ hour prior to and remain closed until ½ hour after each meal service.

Definitions

Combination food – Products containing two or more components representing two or more of the recommended food groups: fruit, vegetable, dairy, protein or grains.

Entrée – A combination food of meat/meat alternate and whole grain rich food; or a combination food of vegetable or fruit and meat/meat alternate; or a meat/meat alternate alone, with the exception of yogurt, low-fat or reduced fat cheese, nuts, seeds and nut or seed butters and meat snacks.

Whole grain-rich – Foods that contain 100-percent whole grain or contain a blend of whole-grain meal and/or flour and enriched meal and/or flour of which at least 50-percent is whole grain. Whole grain-rich products must contain at least 50-percent whole-grains and the remaining grain, if any, must be enriched.

Allowable Foods – All Grades

References: Federal Regulation USDA Interim Final Rule 7CFR Parts 210 and 220; Colorado Competitive Foodservice Policy 1 CCR 301-3 2202-R-203.00

Effective: Midnight before, to 30 minutes after the end of the official school day.

Food and Nutrient Standards

- Any food, outside the reimbursable lunch or breakfast meals, sold on the school campus (includes a la carte, school stores, food-based fundraisers, vending machines, etc.) must meet the following food standards:
 - Be a **whole grain-rich grain** product; or
 - Have as the first ingredient a **fruit**, a **vegetable**, a **dairy** product, or a **protein food**; or
 - Be a combination food that contains at least ¼ cup fruit and/or vegetable; or
 - Contain 10% of the Daily Value (DV) of nutrients for calcium, potassium, vitamin D, or dietary fiber.

AND

- Any food (including accompaniments) must also meet these nutrient requirements:
 - Calorie limits (Snack items: ≤200; Entrée items: ≤350)
 - Sodium limits (Snack items: ≤230 mg; Entrée items: ≤480 mg)
 - Fat limits
 - Total fat: ≤35% of calories
 - Saturated fat: <10% of calories
 - *Trans* fat: zero grams
 - Sugar limit: ≤35% of weight from total sugars in foods.

See exemptions to food and nutrient standards on page 3.

Exemptions

NSLP/SBP entrée items sold a la carte: Any entrée item offered as part of the lunch program or the breakfast program is exempt from all competitive food standards if it is sold as a competitive food on the day of service or the day after service in the lunch or breakfast program.

Nutrient standards: Fresh fruits and vegetables with no added ingredients except water; canned and frozen fruits with no added ingredients except water or are packed in 100% juice, extra light syrup, or light syrup; and canned vegetables with no added ingredients except water or that contain a small amount of sugar for processing purposes.

Total fat: Reduced fat cheese and part-skim mozzarella; nuts, seeds and nut/seed butters; dried fruit with nuts/seeds with no added nutritive sweeteners or fats; and seafood with no added fat.

Saturated fat: Reduced-fat cheese and part skim mozzarella; nuts, seeds and nut/seed butters; and dried fruit with nuts/seeds with no added nutritive sweeteners or fats.

Sugar: Dried/dehydrated whole fruits or vegetables with no added nutritive sweeteners; dried whole fruits or pieces with nutritive sweeteners required for processing and/or palatability; products consisting of only exempt dried fruit with nuts and/or seeds with no added nutritive sweeteners or fats.

Miscellaneous: Sugar-free chewing gum.

Nutrient Calculations

Percent Calories from Fat

There are two calculations that often provide slightly different results because the FDA has different rounding rules for the labeling of each of these nutrients on the nutrition facts label. However, if either method results in less than or equal to 35 percent of calories from fat (do not round the result), the product will meet the total fat standard.

Calculation 1:

$(\text{Calories from Fat}) \div (\text{Total Calories}) \times 100 = (\% \text{ Calories from Fat})$

Calculation 2:

$(\text{Total Fat in grams}) \times 9 \div (\text{Total Calories}) \times 100 = (\% \text{ Calories from Fat})$

Percent Calories from Saturated Fat

$(\text{Saturated Fat in grams}) \times 9 \div (\text{Total Calories}) \times 100 = (\% \text{ Calories from Saturated Fat})$

Percent Sugar by Weight

$(\text{Sugars in grams}) \div (\text{Total grams of product}) \times 100 = (\% \text{ Sugar by Weight})$
